EXPERIENCE

JAVA

1) An Android app ([link](#)), which has a lot of content about Overwatch game. There is a list of technologies I used in it:

- Dagger 2
- RxJava 2
- Data binding
- Retrofit 2
- SQLite
- Glide
- Reddit API
- YouTube API
- Google analytics

2) Project ([link](#)), was developed to learn java technologies. There is a list of technologies I used in it:

- Spring MVC
- Spring security
- Hibernate
- Log4j

3) Graduation project ([link](#)), It was made for small pawnshops to monitor debt and generate reports for accounting. Users have different roles and different access to the functions. There is a list of technologies I used in it:

- Swing
- JDBC

PHP/JS

1) Online shop running on "1С-Битрикс" ([link](#)).

2) System to buy tickets through API "Rambler kassa" in cinema app([link](#)).

3) Script reads .csv and write data from it to MySQL DB([link](#)).

4) Also I developed some personal websites, content websites, company websites, online shops etc.
